Professional Summary

Creative and technically-skilled full-stack developer with a focus on building impactful digital experiences. Specializing in UI/UX, front-end/back-end, and app development. Passionate about using technology to enhance productivity and user well-being.

Objective

Eager to contribute my skills and vision by bringing AppleMind to life as a valuable addition to Apple's innovation journey.

Skills

Languages: HTML, CSS, JavaScript, PHP, SQL, Swift
Frameworks & Libraries: React, Node.js, Express, Bootstrap
Tools & Platforms: Git, GitHub, Figma, Adobe XD, VS Code, Xcode
UI/UX Design: Wireframing, Prototyping, Responsive Design
Soft Skills: Problem-Solving, Team Collaboration, Communication, Time Management

Project

AppleMind: Focus & Productivity Assistant
 Personal Project Proposal | Apple Inc. (Hypothetical)
Developed a web-based productivity platform for Apple users to manage time, track usage patterns, and reduce distractions.
Features include Pomodoro timers, mindful break reminders, and personalized productivity reports.
Designed with a focus on simplicity, user-centric experience, and seamless integration with Apple's ecosystem.
